

Company Fact Sheet

Company: Tango Networks™

Headquarters: Plano, Texas

Year Established: 2005

About the Company: Tango Networks converges the power of any enterprise PBX or unified communications (UC) system with the flexibility of any mobile phone to deliver a seamless communications environment.

Founders: Andrew Silver, a technologist with 15 years experience in the telecommunications industry, and Douglas Bartek, an experienced telecom industry executive.

Why We're Named "Tango": Just as the Tango is an intricate dance between two individuals, Tango Networks melds the enterprise PBX and an employee's mobile phone, delivering a single communications tool that provides substantial benefits to all the key stakeholders in the wireless ecosystem: the end user, the enterprise and the mobile operator.

About the Tango Networks Abrazo™: The Tango Networks Abrazo (named for the "embrace" in the Tango dance) integrates an employee's mobile phone with an enterprise PBX. Every mobile phone becomes a true PBX extension. Desk and mobile phones share a single number, and either phone can access advanced corporate calling features.

Funding/Investors: \$25 million Series A; Motorola Ventures, Nortel, Signature Capital, TWJ Capital, and Meridian Capital.

Accolades: In its short life, Tango has received numerous awards including the 2008 and 2007 TMC Labs Innovation Awards, the 2008 Celebration of Enterprise Emerging Company Award, the 2007 Internet Telephony and Unified Communications Products of the Year Awards and Douglas J. Bartek was honored with the Tech Titans Emerging Company CEO Award for 2007. Tango was also featured in Network World as a Wireless Company to Watch and 1 of 10 Tech Start-Ups of the Year.
