PRESS RELEASE

Tango Networks Joins Mitel Solutions Alliance

RICHARDSON, TX, JULY 9, 2008 - Tango Networks™, the leader in seamless enterprise fixed-mobile convergence for unified communications, today announced that it has joined the Mitel® Solutions Alliance (MSA), a comprehensive program that enables a wide range of third-party vendors to create products and services that integrate with Mitel's core business communications portfolio.

The Tango Networks Abrazo™ allows any mobile phone to become a true extension to a company's existing voice communications network. Based on a unique hybrid architecture which melds the enterprise network with the ubiquitous coverage of wireless operator networks, the Abrazo provides the benefits of extending robust PBX feature sets and policies, including least-cost routing, out to mobile phones without the need for high-end devices, handset clients or data subscriptions.

"Mitel has a vast global customer base," stated Al Leo, vice president of sales and business development for Tango Networks. "Through our participation in MSA, Tango will provide Mitel customers the ability to add mobile voice to enhance their unified communications experience with the addition of an easy-to-integrate fixed-mobile convergence solution."

"MSA enables us to build alliances with those companies who share and complement our market vision and can help us implement it rapidly and successfully," said David Lowenstein, MSA Director of Business Development. We are excited to welcome Tango Networks into the program, and look forward to incorporating their products into Mitel's global ecosystem of interoperable solutions."

About Tango Networks

Tango Networks integrates mobile phones into the corporate enterprise, enabling any mobile phone to become a true PBX extension on the enterprise network. With the award-winning Tango Abrazo, enterprises benefit from cost savings and control over mobile service while enabling employees to be more responsive to business needs by providing advanced desk phone capabilities on any mobile device. Only Tango Abrazo leverages the true power of fixed-mobile convergence, fixed-mobile substitution and unified communications to meet an enterprise's continuously evolving business and technology needs. Two phones. One solution. That's Tango. For more information, dance over to www.tango-networks.com.
