Tango Networks Names Alastair Westgarth Chief Operating Officer

Industry Veteran to Lead Operations for Innovative Mobile Device-PBX Integration Company

RICHARDSON, Texas – March 26, 2007 – Tango Networks, the innovative company leading the true integration of mobile devices with office telephone systems, today announced that it has named telecommunications industry veteran Alastair Westgarth as its chief operating officer.

Westgarth, who has served on the Tango Networks board of directors and advisors since the company's founding in late 2005, has now moved into a position where he is responsible for the ongoing operations management of the organization including engineering, sales, marketing and business development. Tango Networks emerged from stealth mode only last month, when it announced its \$25 million Series A funding round.

Tango Networks, which will announce its groundbreaking new fixed-mobile convergence solution at the CTIA Wireless trade show on Tuesday, welcomes Westgarth's 16 years of industry experience, said Douglas J. Bartek, CEO and president of Tango Networks.

"We anticipate rapid growth as carriers and enterprises adopt our solution for marrying mobile phones with enterprise communications systems. Alastair's considerable industry experience and successful track record will help lead us through this exciting time," Bartek said.

Most recently, Westgarth was senior vice president and CTO of Airspan. Previously, he served as senior vice president of Inner Wireless, and before that, executive vice president of engineering for First Broadcasting. Westgarth has also distinguished himself as CEO and president of Navini Networks and as vice president of product line management at Nortel.

About Tango Networks

Founded in late 2005, Tango Networks integrates mobile phones into the corporate enterprise, enabling any mobile phone to become a true PBX extension on the enterprise network. With the Tango Networks Abrazo™, enterprises benefit from cost savings and control over mobile service while enabling employees to be more responsive to business needs by providing advanced desk phone capabilities on any mobile device. Two phones. One solution. That's Tango. For more information, dance over to www.tango-networks.com.
