

Kinetic Telehealth

The Compliant Healthcare Communications Solution for
Mobile Voice, Text & Video

- Secure & compliant Unified Communications on any mobile phone
- Seamless integration of existing Voice, Text & Video apps on clinician, staff & patient mobiles
- Telehealth, remote consultation
- Flexible, simple user identity management masks personal numbers
- Security, privacy, policy compliance including BYOD personal devices
- Simple deployment with all major UC systems

The Kinetic Communications Platform from Tango Networks creates true communications mobility for healthcare professionals.

The Tango Networks' Kinetic Platform makes any mobile device an extension of your existing PBX or Unified Communications system.

The platform orchestrates seamlessly across the communications apps your staff and patients need: Voice, Video, Texting.

- Permits rich UC features on mobiles including BYOD
- Integrates with existing PBX / UC / Video systems
- Policy enforcement, security, privacy compliance
- Identity management separates business & personal
- Single number contact for improved responsiveness
- Mobile call recording, archiving as needed

Tango Networks Mobility Services deliver business communications services on mobile phones using the native dialer for a superior user experience. Mobile UC extends enterprise UC identity and services from an existing PBX system to any mobile phone. Tango's Mobile Call Recording service is the only enforceable solution that works from the native dialer. Business Messaging enables SMS messaging from your business line. These services are available as an add-on subscription via partner service providers including AT&T, Sprint and T-Mobile.
