

Responsible Driver System

A Tango Mobility™ Solution for network-based enforcement of safer driving policies

- ✓ Policy-enforcement solution prevents unsafe mobile phone use by drivers
- ✓ Embedded in wireless network and cannot be circumvented by drivers except in emergency
- ✓ Customized policies in your direct control
- ✓ Enforces policies on any mobile phone
- ✓ Prevents calling, texting, data when unsafe
- ✓ Complements phone-based safety features such as “do not disturb while driving”
- ✓ Urgent communications alarms for drivers to access when safe to retrieve messages
- ✓ Reduces risk and accidents caused by distracted driving
- ✓ Fleet operators, transit, field service, trucking

Cut accidents by reducing distracted driving

Satisfy insurance requirements & control risk

Promote safer driving & greater driver productivity

Tango Networks empowers businesses to extend their UC solutions to any mobile device for any user. Tango’s award-winning Kinetic Communications Platform is the industry’s first software-defined solution to seamlessly integrate mobile devices with business UC applications. Companies deploying Tango can adopt “mobile first” communications, cut costs and improve user productivity.
